UPDATE: Former Philippine president Rodrigo Duterte's defense team has asked ICC Trial Chamber III to reject the prosecution's request to inspect items seized during his arrest.

In a filing dated June 26, 2026, lead counsel Peter Haynes argues the request is "too late" and disrupts the case timetable.

In a separate filing with the same date, Rodrigo Duterte's defense team also opposes the prosecution's bid to access "all keys" seized during the arrest of his client, slamming it as a "fishing expedition" that violates the privacy rights of innocent family members. #DuterteinICC | via Jonathan Magistrado, ABS-CBN News

Nagpost si Ex-Congressman Kiko Barzaga matapos mabalita ang barilan sa NLEX, kung saan tatlo ang iniulat na sugatan sa engkwentro ng pulisya at umano'y robbery-holdup group.

Sa kaniyang post, kinuwestiyon ni Barzaga kung isisisi na naman ba kay Duterte ang naturang insidente. Aniya, "May barilan sa NLEX kanina, kasalanan ba ni ulit ni Duterte yan? Hintayin natin yung presscon ng PCO 😂😂😂"

Ang pahayag na ito ni Barzaga ay kaugnay sa napapabalitang madalas na pagsisi sa mga Duterte sa mga insidente ng karahasan na nangyayari sa bansa, lalo na ng kanilang mga kalaban sa politika.

President Ferdinand Marcos Jr. appointed former Taguig City mayor and veteran television director Lino Cayetano as the new General Manager of PTV-4 on June 4, 2026.
Just a week into his term, Cayetano announced that ABS-CBN Corporation, GMA Network, and Media Quest Hostings/TV5 "reached out" to collaborate with PTV-4.

Chairperson Victoria C. Recio, vice chairperson Prof. Antonio Contreras, and board member Atty. Joji Alonso adopted the resolution of granting Cayetano the authority to enter formal agreements with the said networks.

Napaka-importanteng estratehiya going into social media,
transitioning into being able to reach a wider audience through different digital mediums, pero free TV is still one of — 'yung pinaka-importanteng mga corridors natin.

Ikinadismaya ni Senator Risa Hontiveros ang pagtanggi ng Germany-based developer ng GoreBox na si Felix Flip na dumalo sa pagdinig ng Senado para sa imbestigasyon kaugnay ng insidente ng pamamaril sa isang paaralan sa Tacloban.

Iginiit ni Hontiveros na dapat igalang ng lahat ng developers at online companies na nagnanais mag-operate sa Pilipinas ang mga batas at institusyon ng bansa. Aniya, ito ang pinakamababang pamantayan na dapat nilang sundin upang makapagnegosyo sa Pilipinas kung kaya't nararapat lamang nilang kilalanin ito. | DZRH News

During the Philippine-American War in the early 1900s, the “water cure” controversy exposed the brutal methods used by some American soldiers against Filipino prisoners and suspected guerrillas. The water cure was a form of torture where a prisoner was forced to swallow large amounts of water, sometimes while being held down, to extract information or confessions. Reports of this abuse shocked many Americans because the United States had claimed it was bringing “civilization” and democracy to the Philippines. In 1902, U.S. Senate investigations heard testimony that the practice had been used, and even William Howard Taft described it as a form of torture. The controversy became one of the darkest examples of abuse during the American occupation and showed the violence behind the campaign to suppress Filipino resistance.

STATEMENT OF FELIX FILIP, FOUNDER OF F2GAMES AND DEVELOPER OF GOREBOX ON DECLINING TO APPEAR BEFORE THE SENATE
As a developer based in Germany, I respectfully declined the invitation to appear at the Senate hearing. That is separate from the investigation itself, which I intend to cooperate with. I want the facts of this established as much as anyone does, and I'll help the Philippine authorities in every way I lawfully can. I've been in contact with them, and I'd only ask that the investigation be allowed to run its course. Out of respect for the families, I won't speculate about its causes while it's ongoing.
GoreBox is made for an adult audience. It isn't designed, rated, or directed at players under 18, and it's distributed through Steam and Google Play under their age-rating and parental-control systems. On the more detailed questions about safeguards and content, I'm engaging directly with the relevant authorities through the proper channels, so I'd rather not characterize those specifics in the press while that's underway.

The Department of Environment and Natural Resources has raised public awareness following multiple sightings of the Finlayson's squirrel in several parts of Metro Manila. Native to mainland Southeast Asia, this squirrel is not naturally found in the Philippines. Reports describe the animals moving through city parks, university campuses, trees, and even along electrical wires, indicating that they have adapted well to urban environments.

Environmental authorities caution that although these squirrels may appear harmless or attractive, they are considered an invasive species. Without natural predators in the Philippines, their population could expand and compete with native wildlife for food, nesting sites, and other resources. Invasive species are recognized globally as one of the leading threats to biodiversity because they can alter ecosystems, displace native species, and disrupt ecological balance.

Experts believe the squirrels were most likely introduced through the illegal wildlife pet trade, with some individuals escaping or being intentionally released into the wild. Once established, invasive mammals can be difficult to control because they reproduce successfully and adapt to a wide range of habitats. Their presence also raises concerns about possible damage to vegetation, crops, and urban infrastructure, including electrical systems where they frequently travel.

The DENR advises the public not to feed, capture, or handle these squirrels and instead report sightings to local environmental authorities. Early detection and monitoring are important components of invasive species management, helping scientists assess population size, distribution, and potential ecological impacts before they become more difficult to address.

The sightings serve as a reminder that responsible pet ownership and strict enforcement against illegal wildlife trade are essential for protecting the Philippines' native biodiversity. Preventing the introduction and spread of non-native species remains one of the most effective ways to conserve the country's unique ecosystems and endemic wildlife.

'CONGRATULATIONS' TO 'I DO' 🎓💍

Doble-tamis ang graduation ng isang netizen, na bukod sa kanyang diploma ay nakuha rin ang "matamis na oo" ng kanyang girlfriend.

Viral na ngayong June 26 ang graduation proposal ni Jimuel de la Peña sa kanyang nobya.

"I know this is the right time na since we have a lot of goals listed in our timeline and adding a check mark on this part is one of my biggest plan," caption ni Jimuel sa post.

Ayon kay Jimuel, dumating na ang tamang panahon upang mag-propose matapos nilang maabot ang ilan sa kanilang mga pangarap bilang magkasintahan, kabilang ang pagkakaroon ng sariling bahay at negosyo.

Violent Video Games and Real-World Violence:
Rhetoric Versus Data

Patrick M. Markey
Villanova University

Charlotte N. Markey
Rutgers University

Juliana E. French
Villanova University

Laboratory and correlational studies often find a link between violent video games and minor or benign forms of aggressive behaviors (e.g., exposing an opponent to an unpleasant noise). Based on these studies, the media, lawmakers, and researchers often imply a link between violent video games and violent criminal behavior.

cides also decreased after these violent video games were released and displayed significant decreases 3 and 4 months following the release of these games.

Discussion

Laboratory and correlational studies suggest violent video games are a causal risk factor for increased aggressive cognition, aggressive af-

monthly using large-scale time-series data analytic techniques (e.g., ARIMA, SARIMA, interrupted time designs, CCFs, etc.). Concurrent effects of violent video games and lagged effects lasting months and years were considered.

Contrary to the claims that violent video games are linked to aggressive assaults and homicides, no evidence was found to suggest that this medium was a major (or minor) contributing cause of violence in the United States.

HAPPY PRIDE!
Ang Pride ay isang paalala ng kahalagahan ng paggalang, pagtanggap, at pantay na oportunidad para sa lahat. Mas nagiging matatag ang ating mga komunidad kapag bawat isa ay may pagkakataong mamuhay nang may dignidad, kalayaan, at respeto. Kapag walang naiiwan at walang naiiwanan, mas marami ang nagkakaroon ng pagkakataong umunlad at magtagumpay.
Sa mga kabataan, huwag na huwag kayong magsawa na magpahayag, makibahagi, at manindigan para sa isang mas makatarungan at makataong lipunan.

What's going on with people asking others to comment "Amen" on their post?

Unanswered

Why do people ask others to comment "Amen" on their post?

Why do people ask others to comment "Amen" on their post?

I've seen it on YouTube, I've seen it on Twitter, I've seen it on TikTok. There are posts out there where people ask others to comment "Amen" or "God is Good" across channels and accounts. What is this? Is this some sort of link between accounts so that Christian videos show up in people's feed?

Akala nila parang social media engagements lang 'yan [na] pinupuri sila, binobola nung mga DDS pero 'yung mga 'yan sa korte, wala ang mga 'yan. Kahit na ilang engagement ang ibigay sa inyo d'yan [at] ilang papuri ang ibigay sa inyo d'yan, pero sa korte, kayo lang.
